

BOB PAGE Seminar

Multi-Lead Medics 12 Lead Course: (May 21st, 2014 – 08:00 to 17:00)

If anyone told you that you could take a 12 lead class and have fun, would you believe them? Presented by Bob Page, Author of the book 12 Lead ECG for Acute and Critical Care Providers, this 8-hour, highly motivating, non-stop interactive course on 12-Lead ECG, presented internationally, includes proper lead placement, axis and hemiblock determination, bundle branch blocks, differentiating wide complex tachycardia and myocardial infarction recognition. Also included is the use of a 15-lead ECG. Participants in the program will read approximately 200 12-lead ECGs, gaining both experience and confidence in their newly learned skill. There is also web site support of graduates of the program by continual competency and feedback from the instructor. The seminar is delivered as a state of the art computer presentation enhanced with sound, graphics, animation, music and video clips.

Bob Page's – "12-Lead ECG for Acute and Critical Care Providers" will be available on site for \$60

"SLAP the CAP" Capnography Course: (May 22nd, 2014 – 08:00 to 17:00)

First presented in 1998 as "Riding the Waves", this is one of the first Nationally presented courses on capnography that is an eye opening experience when participants learn the incredible benefits gained from full ET/CO2 monitoring and waveform assessment. This is a comprehensive 8 hour workshop. In this exciting and informative session, Bob reviews the related A&P of the respiratory system and explains, through the use of multi-media and audience involvement, the role of capnography in EMS; from cases of cardiac arrest to airway and ventilation; assessment and management, from closed head injury to tension pneumothorax to shock. From triage of any patient to the ongoing monitoring of the patient. In fact, anyone with a problem with ABC's should have continuous monitoring of ET/CO2 and waveform. Come and learn how to integrate this session into your practice and utilize it to its fullest potential! Capnography: It's not just for confirming tube placement!
